

ADELAIDE CENTRAL MARKET

Lego Model Replica

ABOUT THE BUILD

Part Count: 9,084

Build Time: 21 Hours

Design Work: 75+ Hours (3 Months)

Approximate Size: 75cm x 65 cm x 45cm

MODEL INSPIRATION

It began with my first large scale model of the Beehive Corner building I completed in 2021. Adelaide is filled with beautiful heritage buildings and there were so many options for my next major build. Ever since a young age I've shopped at the Central Market with my Dad. This has lead me to fall in love with the stalls and culture around the market. It was important to get each small detail identical to the real market building and this was definitely a difficult challenge. I love the design of this 120 year old construction and I couldn't help but bring the building to life from Lego bricks.

ABOUT THE CREATOR

Hi, I'm Micah Sarre - Micsar64 - and I am a 19 year old custom Lego designer & creator based here in Adelaide. Ever since I can remember I have been hands on building and creating things. As I approached my teenage years my interest in Lego grew and grew. I was a part of my Dad's woodworking business where we handcrafted timber furniture together and this inspired me to build Lego more. By the age of 13 it got serious. My passion for Lego gives me the opportunity to be creative and hands-on, and my dream is to create custom designs that bring joy to people of all ages and inspire other creators. I am a person with high values and expectations of how I live and want to make the most out of my life and passion every day.
